

# PigCHAMP <sup>></sup> Mobile

THE POWER OF KNOWLEDGE

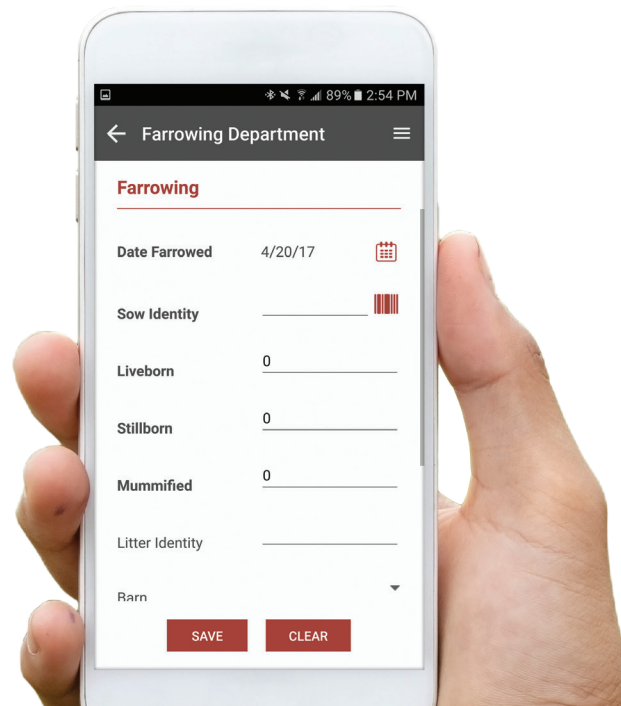

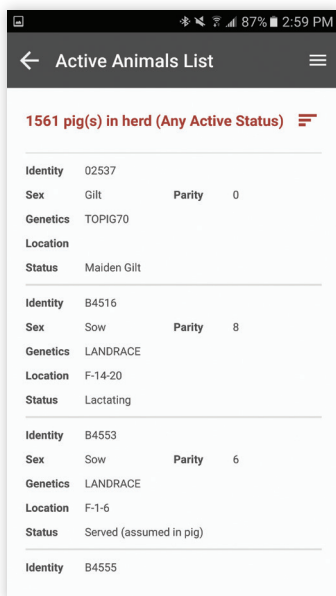

The **PigCHAMP Mobile** app allows for real-time reproductive data input through any mobile device, while providing basic reporting functionality and validation to users to help minimize data entry errors. **PigCHAMP Online** or **Client Hosted Application** users can access their farm data on a phone or tablet via a strong internet connection or through the intermittent mode, allowing the use of the app in areas with limited internet capabilities and stores data on the device until internet is restored.

Intermittent mode is NOT available for iOS devices.

## FEATURES

- › In-barn data validation
- › Optional intermittent connectivity
- › Bluetooth-enabled RFID function
- › Bar code scanning
- › Real-time data
