

PigCHAMP [®] Mobile

For **Android™** and **iPhone® / iPad®**

The PigCHAMP Mobile Application allows for remote data entry of PigCHAMP Reproductive information while providing reporting functionality and validation to users. This phone or tablet app, allows users to interact directly with PigCHAMP Online via an internet connection.

All of the data you would generally record in the PigCHAMP computer application can now be easily entered into the PigCHAMP Mobile App. This gives you the convenience of not just data entry, but reports such as active animal lists, sows due for attention, and more.
