

## PigCHAMP Client Hosted Application (CHA) Update Instructions

1. Download the updated Client Hosted Application from the PigCHAMP website; [PigCHAMP Software Downloads Additional Applications & Guides | Swine Management Software | PigCHAMP.com](http://PigCHAMP Software Downloads Additional Applications & Guides | Swine Management Software | PigCHAMP.com)
2. Once downloaded, launch the setup file. Select your preferred language and continue to follow the installation wizard.
3. Select the CHA web service components to upgrade. Both the DLL and Web Service are required for operation. Languages chosen on this screen determine which language will be available on the mobile app.

4. Verify the location of the server\instance and the timeout value.
5. Finish the installation wizard.
6. In IIS Manager
  - Recycle the Application Pool associated with PigCHAMP Mobile
  - Restart the website associated with PigCHAMP Mobile

**Note:**

If you receive an error as shown when trying to complete the installation wizard, open Task Manager and End Task the w3wp process associated with the Application Pool name used for PigCHAMP Mobile (see below).
